

ANNUAL REPORT

2024

"Coming together is a beginning. Keeping together is progress. Working together is success." - Henry Ford

We are AITC-SK

I love agriculture and thrive on the energy of its people, connections, and opportunities. I'm constantly generating new ideas to engage young people and am continually inspired by the incredible individuals I get to interact with.

Sara Shymko

Executive Director

A Note from the Executive Director

Our team's expertise and dedication are driving meaningful change. Today's youth are the innovators and decision-makers of tomorrow, and we need them to champion and lead the future of agriculture.

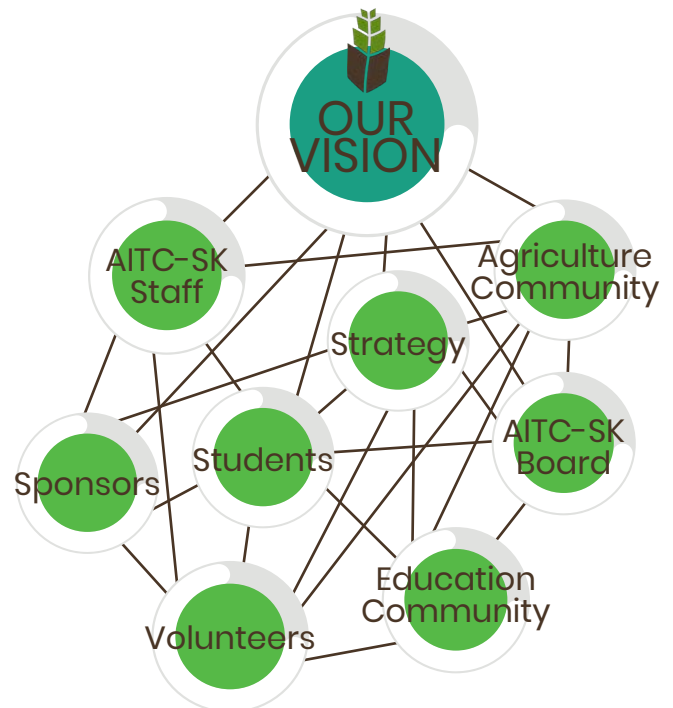

By fostering curiosity, knowledge, and connections, we are shaping a more informed and sustainable future—one lesson, one experience, and one young leader at a time.

Our Mission

Agriculture in the Classroom SK bridges the widening gap between youth and the reality of where their food comes from. Through our hands-on programs and resources, we cultivate a crucial understanding of science, economics, and environmental stewardship. Our mission is to connect youth and agriculture through engaging programs.

Our Vision

We have a vision of a Saskatchewan community that understands, appreciates, and respects agriculture.

People, strategy, and connection are foundational to reaching our vision.

Strategic Communications

Our strategic communications are a cornerstone of our growth. By harnessing a mix of digital channels, traditional media, and community engagement, we've enhanced our narrative and built stronger relationships with stakeholders. This integrated approach has not only deepened trust and boosted awareness but also attracted new supporters, ultimately amplifying our overall impact.

Maria Hadley-Cole
Communications Coordinator

Maria managed social media!

"Who is AITC-SK?! I get to show you through the work I do every day! My role is building AITC-SK's identity, creating a fun, engaging, and trusted brand that is doing critically important work in our province. Sharing impact stories from our team's incredible work energizes me!"

Positive Partnerships

Long term sustainability and transformative change goes beyond securing funding – it's about getting to know our supporters, listening to their stories and what drives them, and understanding their values. Strong relationships are the foundation of AITC-SK and by building trust and a shared vision, together, we are securing a bright future for agriculture.

Agriculture Community Engagement

We are making an impact, but our work is far from over. If we ever hope to reach every student in the province, more support is needed. We attended the following events in 2024 to build awareness and grow our knowledge:

- SARM Convention
- Women in Ag CONNECT Conference
- Crop Production Show
- Ag in Motion
- Doolie Project
- South Saskatchewan Community Foundation Friendraiser
- Yorkton Harvest Showdown
- Food, Fuel, and Fertilize Summit
- Convergence Conference
- Canada's Farm Show
- Canadian Agriculture Farm Advisors (CAFA), Regina Branch
- Canadian Western Agribition Receptions

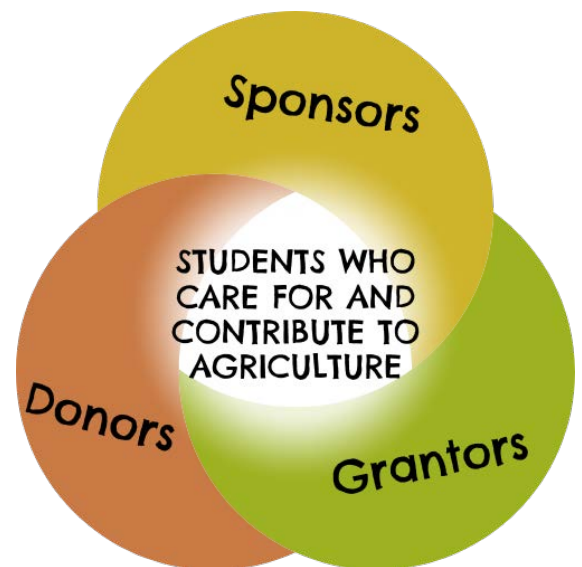

Diversified revenue sources allows AITC-SK to be more adaptable, enabling us to adjust our operations to meet evolving needs and opportunities.

The best part of my role is connecting passionate supporters with meaningful opportunities to inspire the next generation about agriculture. Seeing the impact of our initiatives and the excitement of students learning where their food comes from energizes me every day.

Impactful Initiatives

With passion and expertise, our staff deliver engaging programs that deepen students' understanding of food production, sustainability, and career opportunities—empowering them to see their place in agriculture's future. While programs are led by one Program Coordinator, often many other staff are involved in the delivery of programming.

Volunteer Management

Volunteers are critical to the success of over 30 programs throughout the year. Their firsthand knowledge and experiences provide invaluable insights that resonate with students, helping them make meaningful connections between the food on their plates and the people who produce it.

Partner Programs

AITC-SK is proud to partner with many organizations to offer fun, educational programs to students. Paige and the Programs Team work closely with our Partners to deliver valuable learning experiences for students and teachers.

The highlight of this past year has been working with our incredible volunteers, whose passion and dedication bring every event to life. Their enthusiasm not only enhances the experience for students but also helps create lasting connections to agriculture. Seeing their excitement and commitment firsthand has been truly inspiring, and we are so grateful for the impact they make in every classroom and event.

Teacher Professional Development

Our teacher workshops are designed to empower educators at every stage of their career, from teacher candidates to seasoned professionals. The consistent feedback we receive is that they leave feeling confident and excited to integrate our initiatives into their classrooms, equipped with new knowledge and practical tools.

Paige Pister
Programs Manager

School Garden Programs

Learning comes to life when students grow and eat healthy food right in their classrooms. By participating in growing their garden, students gain a deeper understanding of where their food comes from—making learning hands-on, meaningful, and fun! Little Green Thumbs is a full-year growing program, and Little Green Sprouts is a month-long program!

Teacher Workshops

12 new teachers learned about the garden equipment and creative teaching strategies, and connected with fellow passionate educators.

Classroom Experiences

As students care for their garden, they develop teamwork skills, explore sustainability, and learn about food production.

Classroom Celebrations

Hand-on presentations celebrating students' green thumbs and connecting the gardens to agriculture and food.

Reaching over 13,000
students in Saskatchewan!

I'm most energized by the excitement and appreciation students develop for gardening and food through the programs I run with AITC-SK. I can't wait to travel around the province again this spring to see how gardening continues to inspire students and teachers, and how they're making connections between the garden, their communities, and agriculture around the world!

A day of learning about planting, composting, bugs, and soil! With teacher sanctions in early 2024, some classes joined in-person, while other classes received learning kits with tomato starter plants, wildflower seed ball mixes, and a special planting video from a volunteer.

21 STATIONS

Biotech Blast

Middle years students gain hands-on experience with real-world science and biotechnology applications in agriculture. Engaging with industry leaders, they explore cutting-edge innovations and discover how science shapes the future of food and farming.

200+ STUDENTS

I enjoy collaborating with the various agriculture organizations and educators to develop innovative events throughout the year! This teamwork not only enriches our programs but also fosters a vibrant community dedicated to agricultural education. The reward is seeing students' faces light up while discovering new knowledge and interest in the science and careers of agriculture!

Science Teacher Workshop

Teachers discover STEM and agriculture in Saskatchewan. Their newfound knowledge empowers them to create more engaging and effective learning experiences, sharing good information with students and sparking an interest in agriculture career paths.

Program Coordinator

Sask Food Story

Students get a firsthand look at modern agriculture and Saskatchewan's role in global food production, growing a deeper understanding of the innovation and impact of local farmers.

STUDENTS 400+

3 DAYS

The history of agriculture in Saskatchewan cannot be told without sharing the story of Indigenous people and practices that influenced the development of our province. This is why, with the help of a Métis committee, we are developing a section that is directly focused on Métis history and the significant role they played in Saskatchewan's agricultural history.

Teacher Expedition

The three-day professional development experience connects educators with people in agriculture, providing valuable insights into food production, innovations, and careers in agriculture. This experience empowered 15 teachers to bring real-world agricultural knowledge into their classrooms, inspiring students for years to come to understand and appreciate the industry that feeds our province and the world.

High School Classroom Presentations

Building 21st-century skills through an agricultural lens, students explore the diversity of agriculture careers, global food sustainability, and the financial realities of food security. These presentations inspire critical thinking, problem-solving, and a deeper understanding of agriculture's role in feeding the world.

88

PRESENTATIONS

Spring

Fall

My favourite part of the job is interacting with students and teachers and sharing my passion for agriculture and education. It is always so satisfying to hear students say they love participating in hands-on activities, whether inside or outside the classroom, because you know they are going to take something out of it. I often hear from teachers that their students are more engaged and immersed in the agriculture world than ever.

Mary Sidloski

Sustainability
Program Coordinator

Students meet a local food hero! Ag volunteers build real connections to agriculture in students' local community, making agriculture more relatable and highlighting future career paths that help feed the world.

Matching

Coordinating ag volunteers to visit classrooms in their area, identifying gaps and seeking out volunteers.

Volunteer & Teacher Support

Fielding questions and inquiries, and supporting volunteers with their classroom visit.

Resource Development

Each year, a new resource is created to accompany the classroom visit. *All the Farmers You Will Know* storybook and activities highlighted the diversity of people in agriculture.

STUDENTS 7,518

332 PRESENTATIONS

VOLUNTEERS 161

Stepping beyond the classroom, students engage all their senses—sight, sound, and smell—in agriculture, making learning more meaningful and memorable. Students explore key aspects of food production, gaining a deeper appreciation for where their food comes from and the vital role of farming in their daily lives.

My role as Program Coordinator has taken me to classrooms and events all over the province this past year! I've had the privilege of working with inspiring teachers and volunteers, and I think we'd all agree that there's nothing quite like seeing students get excited about agriculture. Whether encountering a cow for the first time at Agribition, digging up 'undies' at a Food Farm, or listening to a volunteer's personal ag story during a CALM presentation, these moments create meaningful connections to agriculture. I'm so proud of the work and passion that goes into making these experiences happen!

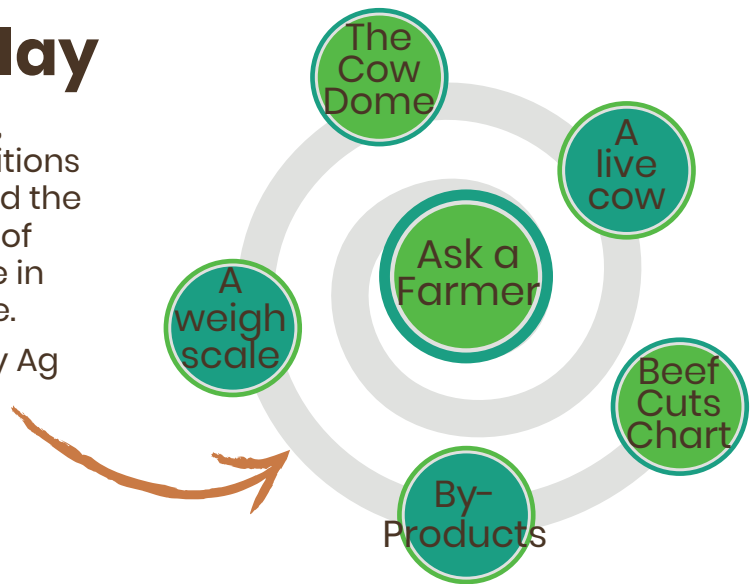

Anna MacDonald
Program Coordinator

Beef Education Display

The Cow Dome, a mobile learning exhibit, traveled to agricultural events and exhibitions around the province helping students and the public better understand the critical role of cattle ranching. AITC-SK played a key role in developing a new 360 video for the dome.

The 'Bovine Alley' experience in the Family Ag Pavilion at Canadian Western Agribition.

AgMazing Challenge

Middle years students attended Canadian Western Agribition, exploring the grounds and visiting agricultural booths to answer questions about our food system and discover agriculture.

I sat in the Cattle Dome many times with students as they got to learn more about beef production in the Saskatchewan. Seeing the excitement as the cattle were coming up to the screen and the kids feeling as though they were in the pasture with them is definitely a moment I will never forget. The joy on their faces was evident, and thinking about our beef operation at home, I couldn't help but be excited with them!

Grace Christensen
Programs Intern

DISCOVER WHERE YOUR FOOD COMES FROM

Ag Experience
FOR STUDENTS

Urban students embark on an action-packed day of discovery, exploring the importance of agriculture in Saskatchewan and beyond. They get up close with livestock, explore food production, and meet industry members—building trust in the people, animals, and innovations that help feed the world.

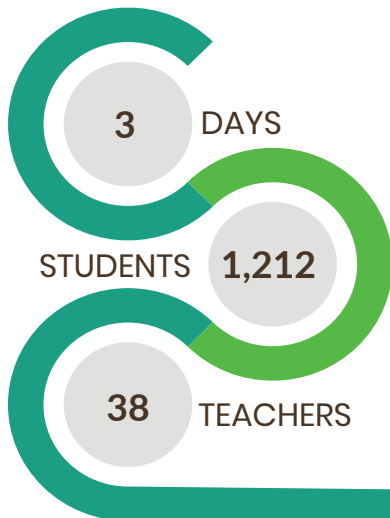

Farm & Ag Tours

Students have the unique opportunity to step beyond the classroom and experience agriculture firsthand. For many students, it's the very first time visiting a local farm and connecting with the people who produce our food, asking meaningful questions, and gaining a deeper understanding of agriculture. AITC-SK provides a bursary to help cover travel costs.

Grains of Saskatchewan Display Revamp

Scott led the project in 2024, coordinating the efforts of Saskatchewan grain commodity groups, the AITC-SK team, and display builders. The newly reimagined display integrates modern features and refreshed content, and was launched in early 2025. The exhibit will attend events throughout Saskatchewan and we look forward to sharing about its inaugural tour in next year's report.

Thanks to SaskWheat for their support in securing funding through the Ministry of Agriculture for this project!

Thank you for your contributions!

Scott Tulloch
Program Coordinator

First-Time Farmers

A new resource that delves into the fundamentals of where food comes from for young learners. By learning the basics of farming, plants, and animals, students gain foundational knowledge to grow their understanding of agriculture.

Classroom Presentations

Classroom Presentations bring agriculture to life. Our dynamic summer students are welcomed into the classroom creating an atmosphere where students are engaged and having fun while learning critically important information about food production.

214

PRESENTATIONS
IN MAY & JUNE

The original concept of the Middle Years Beef Presentation and the planning and coordinating of the Teacher Agriculture Expedition also came from the summer students.

Edible Enterprises

Students get a real-world look at the exciting opportunities in the food industry, from farm to consumer. Through hands-on cooking, problem-solving, and mentorship from industry professionals, students develop critical thinking, entrepreneurial skills, and a deeper understanding of food production, processing, and marketing—preparing them for future careers in agriculture, business, and beyond.

When asked what the teacher enjoyed about the program:

“Hands-on, creative, and gave students independence in creating their own product.”

240
STUDENTS

Environmental Science Learning Kit Revamp

To maintain our promise of offering accurate, balanced, current, and science-based information, we are updating this popular High School resource. Sydney is leading the update and, with the input of a teacher focus group, is adapting the resource to be more modular and provide flexibility for the teachers utilizing it.

**Launching
September
2025!**

I am energized by seeing the initiatives I developed in action. Pictures from the Edible Enterprises program were shared with me. Seeing pictures of their amazing food and hearing that they found the program enjoyable and valuable was very rewarding for me. (and surprisingly emotional, I almost got a little teary). It was a great reminder of why this is such an amazing place to work because there is that direct impact on students.

Sydney Boulton

Educational Resource
Coordinator

Hands-On Resources

Resource Assembly

AITC-SK has over 70 physical resources for teachers to access on our Resource Library. This includes 15 different learning kits that require assembly of the materials included in them. Rachel manages the inventory and assembly of resources, coordinating volunteers to support when available, ensuring teachers receive their orders in a timely matter.

"Your presentation made me so excited to find more french resources to include in my unit plan ... I already placed my order for the Seed Kit and Blossom's Big Job.

Thank you so much for everything you and your team do! This is an incredible resource for educators!"

-Katelyn Jenkins, teacher

Resource Distribution

Last year, Rachel distributed 4,173 resources to teachers across the province!

That's
22
EVERY
school
day!

What I am most proud of is knowing what our resources do and the positive impact they have on students and teachers. Making a difference brings me joy and recognizing how much I have grown over the years and the challenges I've overcome keeps me going above and beyond for my team and the ones we make an impact on.

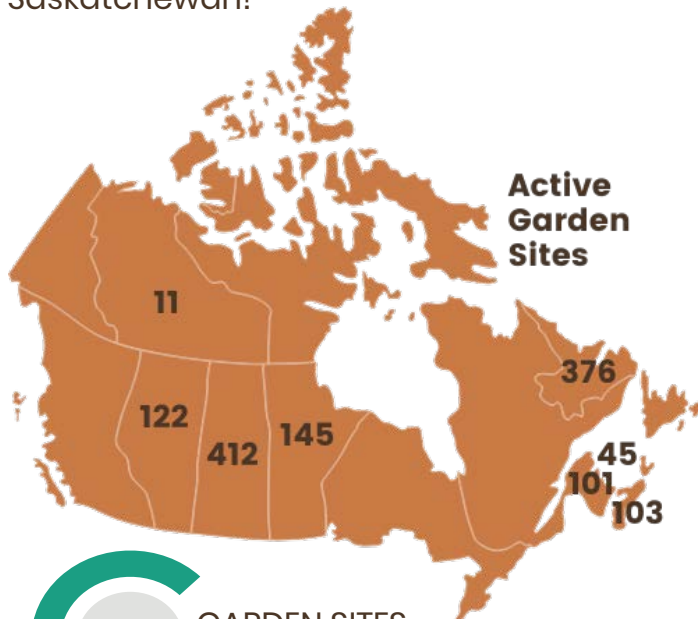

Rachel Andres

Resource Administrator

National Programs

The Classroom Garden Programs, Little Green Thumbs and Little Green Sprouts, are managed nationally right here in Saskatchewan!

1,315 GARDEN SITES
NATIONALLY

It has been an incredible opportunity to join the Little Green Thumbs and Agriculture in the Classroom teams. To be able to play a part in helping kids across the country get a chance to grow food is a dream come true. This program has an immensely positive impact by inspiring kids to learn about growing food, interacting with their environment, and working together. When a seed is planted, only good can come of it.

Little Green Thumbs
plant grow eat share

Little Green Sprouts

Brit MacDonald

National Program Director

Brit is a visionary, a builder, and a true champion for school gardens, driving the growth of Little Green Thumbs across seven provinces and launching Little Green Sprouts to meet rising demand. Her passion, creativity, and drive shaped the national garden programs, strengthening teacher training, resources, and branding. We thank Brit for her incredible impact.

Logistics Coordinator

School Gardens are Making an Impact

What teachers are saying...

95%

noted an improvement in the learning environment of their class after introducing the program.

90%

reported that the program improved the mental and emotional health of their class.

100%

reported that the program is effective in encouraging garden based learning.

Will Brooks

National Program Director

Cassidy Lamb

Logistics Coordinator

Agriculture in the Classroom Canada

AITC-Canada, working in partnership with provincial members, drives agricultural literacy nationwide. AITC-Canada develops national initiatives that are delivered provincially, elevates ag education on the national stage, and enhances efficiency for members through shared platforms and services. Working collaboratively, we amplify our collective impact on agricultural education.

Students discover agriculture all across the country! Featuring diverse tours like sea buckthorn, robotic dairy barns, research farms, and more, these virtual tours are easily accessible, exciting, and educational.

A portrait of Dean Elliott, a man with glasses wearing a red and blue plaid shirt, standing with his hands on his hips.

I feel energized to be part of a Board that sets strategic direction to promote the ongoing development and implementation of engaging, curriculum-based programs and resources for K-12 students and teachers.

Dean Elliott
Chair

A Note from the Chair

Thank you to Sara and the entire AITC-SK team for their ongoing commitment to providing a diverse range of engaging programs and resources that support K-12 students and teachers in learning about the agriculture industry.

The Board's enhanced strategic focus ensures that AITC-SK can continue to thrive in developing and delivering programming and resources for future generations of students and their educators.

Board members reflect the diversity of agriculture in Saskatchewan, ensuring we share the stories from all areas of the agricultural sector.

Board of Directors

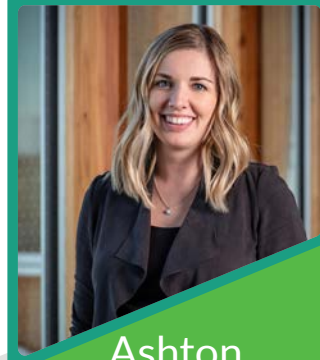

The Board has become more strategic in focus, providing strong HR, Finance, and Governance committees to support all aspects of the organization. Working closely with Sara and her team allows the Board to make decisions that provide the greatest impact for students and teachers. The Board Members appreciate all funding from individuals and organizations and welcome volunteers from the entire sector to help deliver our messages to students and teachers.

Cash at beginning of period	199,047	120,357
Cash at end of period	\$ 112,279	\$ 199,047

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

1. Nature of operations

Agriculture in the Classroom Sask. Inc. (the "Organization") was incorporated under *The Non-Profit Corporations Act* in the province of Saskatchewan on June 14, 1994. Effective July 28, 2004, the Organization became a registered charity under the *Income Tax Act* and, as such, is not subject to income tax under the provisions of paragraph 149(1)(l) of the *Income Tax Act*.

The Organization is an industry-sponsored organization designed to educate students, teachers, and the general public about agriculture and the agri-food industry.

2. Significant Accounting Policies

a. Basis of Presentation

These financial statements have been prepared, in accordance with Canadian accounting standards for not-for-profit organizations ("ASNPO") issued by the Accounting Standards Board of CPA Canada and set out in Part III of the CPA Canada Handbook. The Organization has chosen to apply the following accounting policies.

b. Cash

Cash is defined as cash and short-term investments with maturity dates at acquisition of less than 90 days. The organization's short-term investments are considered to be cash equivalents and are recorded at cost, which appropriates current market value.

c. Inventory

Inventory is recorded at the lower of cost and net realizable value with the cost being determined by the weighted average method.

d. Investments

Investments consist of guaranteed investment certificates, bonds and equities and are accounted for at fair market value.

e. Tangible capital assets

Tangible capital assets are recorded at cost less accumulated amortization. Amortization is provided on the declining balance basis over the estimated useful life of the assets at the following rates:

Computer equipment	55% Declining Balance
Display	20% Declining Balance
Furniture and equipment	20% Declining Balance

In the year of acquisition, amortization is provided at one-half the annual rate.

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

2. Significant Accounting Policies (continued)

f. Internally restricted net assets

Internally restricted net assets reports resources designated by the Board to be held to fund future unforeseen expenditures and special projects.

g. Revenue recognition

The Organization follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred or the restrictions are met. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Sponsorships are recognized as revenue when received.

The Organization recognizes subsidies and grants received from various government programs as revenue in the period earned after all necessary applications have been completed and collection is reasonably assured. If the grant or subsidy arose as a result of incurring certain expenses, the corresponding grant or subsidy revenue will be reported in the same period as the expenses. These amounts may be subject to review by Canada Revenue Agency or other government agencies. Any differences between the amounts recorded in the financial statements and the amounts received will be recognized in income in the period in which new information becomes known.

Sales, sponsorships, membership revenue, project revenue, donations, little green thumbs national, school garden program, Canadian agriculture literacy month, resource library, donations in kind, and other revenue are recognized in the period in which they are earned. Revenue received in advanced are recorded as deferred revenue.

Investment income is comprised of dividends which are recognized in the period in which they are declared, interest which is recognized in the period in which they are earned, realized gains/losses which are recognized in the period in which the sale is realized and unrealized gains/losses which are recognized based on the change in fair market value at the end of the period.

h. Measurement uncertainty

The preparation of financial statements in conformity with ASNPO requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. These estimates are periodically reviewed and any adjustments necessary are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

i. Donations in-kind

Donations in-kind are materials and services that would normally be purchased by the Organization and have been recorded as revenue in the financial statements at fair value.

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

3. Investments

	2024	2023
Guaranteed investment certificate	\$ 325,000	\$ 299,970
USD Equities	247,857	202,116
CAD Equities	193,602	167,500
Fixed income bonds	188,290	180,055
	\$ 954,749	\$ 849,641

The entity has two guaranteed investment certificates with cost of \$75,000 and \$250,000. The GIC's have annual interest rates of 4.19% (fixed) and 4.95% (variable) with maturity dates of March 21, 2026 and May 7, 2025 respectively. USD Equities have been accounted for in Canadian dollars using daily exchange rates.

\$944,574 of the investment balances have been internally restricted, held to fund future unforeseen expenditures and special projects.

4. Accounts receivables

	2024	2023
Trade accounts receivable	\$ 208,265	\$ 325,473
Interest receivable	10,782	7,234
GST receivable	7,998	7,175
Other accounts receivable	-	11,087
Allowance for doubtful trade accounts receivable	(2,654)	-
	\$ 224,391	\$ 350,969

5. Tangible capital assets

	Cost	Accumulated amortization	2024 Net Book Value	2023 Net Book Value
Furniture and equipment	\$ 21,293	\$ (16,225)	\$ 5,068	\$ -
Computer equipment	38,675	(34,434)	4,241	5,534
Display	1,176	(1,176)	-	-
	\$ 61,144	\$ (51,835)	\$ 9,309	\$ 5,534

The organization had amortization expense of \$4,674 in 2024 (\$9,640 - 2023)

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

6. Accounts payable

	2024	2023
Trade accounts payable	\$ 127,969	\$ 79,337
Wages payable	27,719	49,825
PST Payable	7,237	4,460
Other employee deductions payable	1,790	4,413
Government employee deductions payable	-	10,509
	<u>\$ 164,715</u>	<u>\$ 148,544</u>

7. Deferred Revenue

	2024	2023
Other deferred revenue	\$ 44,170	\$ 179,576
School garden program	10,780	15,080
Administration	2,000	5,000
Project funds administration	739	7,500
	<u>\$ 57,689</u>	<u>\$ 207,156</u>

8. Commitments

The Organization leases premises and equipment under agreements requiring aggregate minimum payments over the next two years as follows:

2025	\$ 28,006
2026	\$ 8,106

9. Allocation of expenses

The organization engages in the delivery of a number of programs to educate students, teachers, and the general public about agriculture and the agri-food industry.. The costs of each program include the costs of personnel, supplies and other expenses that are directly related to providing the program. The organization also incurs a number of general support expenses that are common to the administration of the organization and each of its programs.

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

10. Investment income

	2024	2023
Unrealized gain (loss) on investments	\$ 67,390	\$ 46,262
Dividends and Interest	38,027	31,322
Realized gain (loss) on disposal of investment	12,240	(6,035)
Bank interest	765	1,449
	\$ 118,422	\$ 72,998

11. Credit arrangements

The Organization has an available operating line of credit with Affinity Credit Union, for up to a maximum of \$35,000 bearing interest at 7.70% which is due on demand. Interest only payments are required at month end; there are no set terms of principal repayment. As at December 31, 2024, \$nil had been drawn (2023 - \$nil).

12. Financial instruments

The Organization, as part of its operations, carries a number of financial instruments. Financial assets include cash, inventory, accounts receivable, and prepaids, which are measured at amortized cost, and investments which are measured at fair market value as presented on the statement of financial position. Financial liabilities include accounts payable and deferred revenue measured at amortized cost as presented on the statement of financial position.

It is management's opinion that the Organization is not exposed to significant market, other price, or currency risks arising from these financial instruments except as otherwise disclosed. The risks of the Organization include:

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Organization is exposed to credit risk on the accounts receivable from its customers, however, does not have a significant exposure to any individual customer or counterpart. In order to reduce its credit risk, the Organization issues invoices per agreements that have been entered into where collection is reasonably assured.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Organization's exposure to interest rate risk is limited to the investments and line of credit which are subject to future changes in interest rates.

The accompanying notes are an integral part of these financial statements.

Agriculture in the Classroom Sask. Inc.

Notes to the Financial Statements
For the Year Ended December 31, 2024

12. Financial instruments (continued)

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Organization's exposure to liquidity risk is dependent on the receipt of funds from its operations, external borrowings and other related sources. Funds from these sources are primarily used to finance working capital and capital expenditure requirements, and are considered adequate to meet the Organization's financial obligations.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The organization is exposed to market risk on its cash and cash equivalents and investments.

Currency risk

Currency risk refers to the risk that fair value of financial instruments or future cash flows associated with the instruments will fluctuate relative to the Canadian dollar due to changes in foreign exchange rates. The organization holds a portfolio of equity investments in foreign currencies and therefore is exposed to the risk.

13. Comparative figures

Some of the comparative figures have been reclassified to conform to the current year's presentation.

The accompanying notes are an integral part of these financial statements.

Inspiring the next generation of leaders and decision-makers.
