Grade 4 Curriculum Map

SCIENCE	HC4.1: Investigate the interdependence of plants and animals, including humans, within habitats and communities.	SOCIAL STUDIES	RW4.1: Analyze the strategies Saskatchewan people have developed to meet the challenges presented by the natural environment.	HEALTH	USC4.1: Assess what healthy eating and physical activity mean for pre/adolescence.
	HC4.2: Analyze the structures and behaviours of plants and animals that enable them to exist in various habitats.		RW4.2: Investigate the importance of agriculture to the economy and culture of Saskatchewan.		DM4.1: Investigate the importance of personal responsibility and communication in making informed decisions related to healthy eating and physical activity, prevention/management of health challenges, negotiating disagreements, safety and protection, personal identity, and stressors.
	HC4.3: Assess the effects of natural and human activities on habitats and communities, and propose actions to maintain or restore habitats.		RW4.3: Assess the impact of Saskatchewan resources and technological innovations on the provincial, national, and global communities.		
	RM4.3: Analyze how weather, erosion, and fossils provide evidence to support human understanding of the formation of landforms on Earth.		DR4.1: Correlate the impact of the land on the lifestyles and settlement patterns of the people of Saskatchewan.
