# 2019 Annual Report

**Agriculture**   
**in the Classroom**  
Connecting Kids and Agriculture

# Hello!

Agriculture in the Classroom Saskatchewan (AITC-SK) is a registered charity dedicated to connecting kids and agriculture through innovative, experiential, curriculum-based programs and resources.

At AITC-SK we are building a Saskatchewan community that understands, appreciates and respects agriculture.

## Our 2019 Reach

**71,000**  
Students

**8,200**

of them participated in more than one program

“First of all, AITC has been an absolutely incredible resource for my classroom! The excitement for learning that it has cultivated in my students has been inspiring to me! We have accessed about 10 different types of AITC resources this year and all of them have been incredible.”

– Kirsten Tucker, South Corman Park School

\* Every year, our program offerings change slightly due to funding availability and partner priorities.  
 \* Funding for farm tours was very limited in 2019. Seed Survivor, a partnership program with Nutrien, was only offered in Spring in 2019.  
 \* We track the statistics as carefully as we can to eliminate overlap in our total count. However, this is not possible for events/program that are not registration only such as Ag in the City, Children's Festival and Western Development Museum public days for Explore AG.

## Message from the Executive Director

2019 was an inspiring year! We gave thousands of students' meaningful experiences with food and agriculture. Planting a seed, digging in the soil, harvesting a crop, feeding a cow, preparing a meal – these types of experiences help students to understand, appreciate, and respect farmers and agriculture. In 2019, the AITC-SK team worked incredibly hard, delivering resources and programs to 241 communities across Saskatchewan. We could not have done this without the involvement and support of our sponsors, partners, volunteers and board members.

Last year, we increased our focus on teachers. We hosted different professional development experiences for teachers to give them the tools and knowledge to confidently bring agricultural learning into their everyday teachings. We are inspiring teacher champions who are helping us tell Saskatchewan's incredible food story! The momentum from last year is driving us through the global pandemic we face. The innovative ideas of our staff, our focus on creating memorable experiences, and strong teacher connections have helped us to adapt to the changing educational needs in our province.

We are more committed than ever to agriculture education in Saskatchewan, and will ensure that our support for teachers, students and parents continues to evolve. We look forward to sharing our virtual offerings with you in next year's report.

Until then, stay healthy and safe!

Sara  
Shymko

Executive  
Director

The best part of CALM this year was the engaging discussion students had with our presenter...they had a lot of background knowledge from attending Ag-Experience and seed survivor at WDM!"

- Sheri Ritchie, St. Nicholas School

# Program Highlights

## Little Green Thumbs & Little Green Sprouts

For over 10 years, Little Green Thumbs has helped students and teachers across Canada become food producers right in their own classroom. Gardens are living laboratories that help inspire students to wonder, question, experiment and construct their understanding of the world around them. AITC-SK manages the national Little Green Thumbs Hub and provides support to organizations in Alberta, Saskatchewan, Manitoba, Newfoundland and New Brunswick to deliver the program.

In 2019, Little Green Sprouts became the official junior gardening program to Little Green Thumbs. A new Little Green Sprouts logo was launched, and the teacher manual was updated to bring this program to its full potential. Little Green Sprouts is a small-scale gardening program that focuses on growing micro-greens, lettuce and herbs while still offering ample learning opportunities for young students.

Both programs offer students the opportunity to learn about where their food comes from. By being directly responsible for growing and harvesting food, students have a better understanding, appreciation and respect for the food they eat.

“Being a Green Sprouts classroom has been one of the best additions to my classroom this year. The students love being involved in the planting, watering and harvesting!”

– Twyla McNeil,  
Traditions Elementary School

234  
Volunteers

## Canadian Agriculture Literacy Month (CALM)

During March, Agriculture in the Classroom organizations across Canada celebrate agriculture through programming designed to help students learn about, connect to and understand agriculture. In Saskatchewan, we coordinated classroom visits with volunteers from the agriculture community to provide students with the opportunity to learn about where their food comes directly from those involved in producing it. By creating this personal connection for students, we are building trust and respect for Saskatchewan agriculture in our future consumers. Last year, we reached an incredible 9,192 students through CALM who were inspired from hearing our volunteer's personal agriculture stories.

92% of teachers agreed CALM increased their students understanding and appreciation of agriculture and farming.

95% of teachers agreed CALM helped their students understand where their food comes from and how food is produced.

95% of teacher agreed CALM is a valuable curricular-linked learning experience for their students.

"Our presenter and the information was amazing! We are a largely based rural school and seeing how much farmable land there is and learning about food and food waste fit right in my little learners were so engaged!"

- Amber Pladson, Lindale School

Minister Marit shares his personal ag story with students!

# Resource Highlights

## Food Waste & YOU!

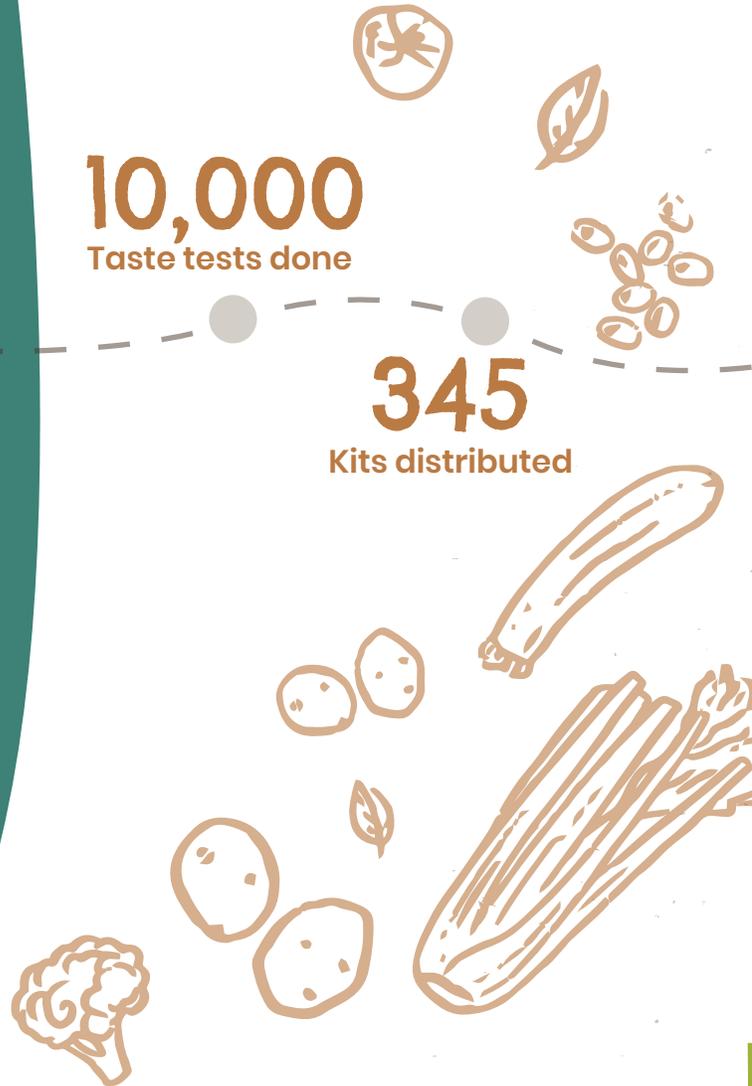

To support Canadian Agriculture Literacy Month, we developed a new resource where students learn about food waste in Canada. Students explore how food is lost or wasted throughout the food value chain, and what the agriculture industry is currently doing to reduce loss and waste. The resource includes a fun activity to see what type of taster students are, and how their personal tastes and actions could contribute to reducing food waste. At the end of their learning, students take the 'Food Waste Pledge' where they vow to follow five action items that will help them personally reduce food waste.

"The slide show was the best part of the presentation. It had so many good visuals and great information."

-Bertha Harvey,  
Wadena Elementary School

# New!

## thinkAG Career Quest

Our team developed and successfully piloted an exciting new career game for High School students. thinkAG Career Quest is an innovative and exciting approach to educating students about careers. This gamified learning experience encourages students to explore how people working in a diversity of agriculture careers help solve social, environmental and economic issues. They use their own interests and goals to earn points for their team, and ultimately begin to see how their interests and goals fit in to a role in agriculture. thinkAG Career Quest's innovative concept is being expanded nationally in partnership with AITC-Canada and will be available to teachers across the country.

**100%**  
of teachers  
agreed

thinkAG Career Quest met curriculum outcomes.

**93%**  
of teachers  
agreed

Students had a better understanding of careers in agriculture after playing the game.

**100%**  
of teachers  
agreed

Their students have a greater appreciation for careers in agriculture.

"Agriculture is more than just farming."

- Grade 7/8 student, Lumsden School, when asked what they learned from the game.

"This game allows students to not only discover the variety of jobs that exist in agriculture, but they linked their own interests to a job in the agricultural industry."

- Susan Barton, Yorkton High School

# Gateway to the Classroom

## Teacher Agriculture Expedition

In August we connected 20 teachers with agriculture over a three-day, 750-kilometer Agriculture Expedition through west-central Saskatchewan. Teachers experienced first-hand the sights, smells and sounds of farms and agri-businesses where they learned about ingredients grown and raised in our province, and more importantly about the people involved in producing these ingredients. There was teacher representation from communities across the province, as well as from all grade and subject levels. We showcased the diversity of agriculture in Saskatchewan and the beauty of our province.

Teachers are consumers too, and through the expedition they were able to feel the passion that producers have for growing safe and healthy food, and to understand that growing food is their livelihood. This experience has built meaningful connections between AITC-SK and the teachers, and ultimately these teachers have become champions for what we do and the knowledge they have gained will influence students for years to come.

**“This experience was good for my soul. I gained so much more knowledge on a wide range of ag experiences to share with students, but it has also impacted me as a person & the choices I will make in my everyday food story.”**

- Krista Bula, Venture Heights School

750km  
Agriculture  
Expedition

20  
Teachers

13  
Stops

100% of teachers rated the tour as excellent.

82% of teachers said the tour completely increased their understanding of agriculture.

Many teachers stated a highlight of the expedition was the direct interaction with the farmers and producers.

## Biotechnology Professional Development Workshop

We want to empower high school teachers with knowledge and tools to help them teach science with confidence. In September, we hosted a Biotechnology Professional Development Workshop where teachers expanded their understanding of biotechnology research and innovation in Saskatchewan. Teachers were given the tools to answer student's questions, easily connect real-life examples to textbook examples, and inspire students to consider a career in biosciences!

**"This day has made biotechnology more localized and current in my eyes. I feel like I always thought of biotech as something that took place somewhere else. Although I always knew there was innovative work being done in Saskatchewan this gives me concrete evidence and examples."**

- Sara Prakash, Teacher

**100%**

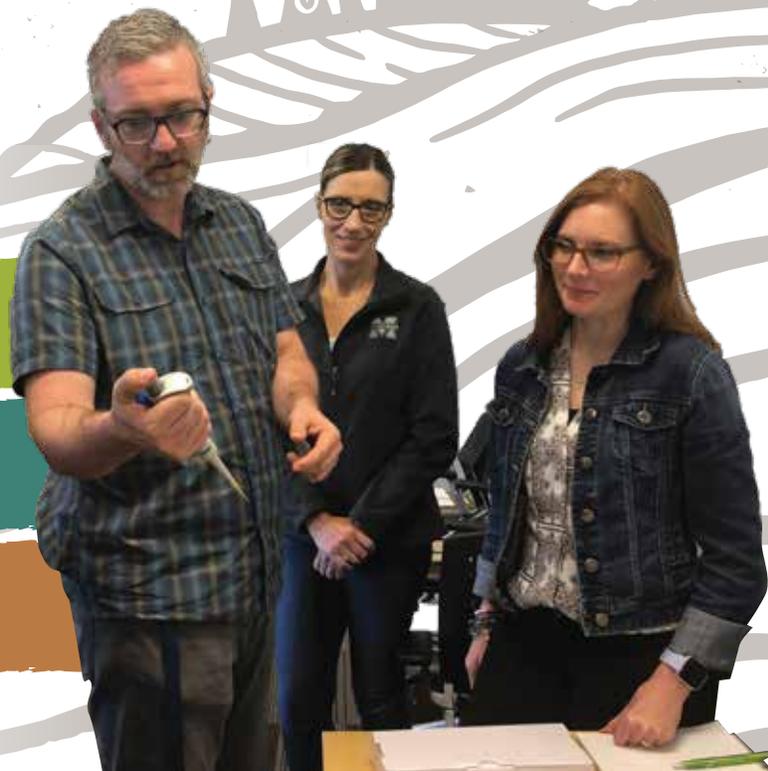

of teachers agreed the workshop "definitely" increased their understanding of biotechnology in agriculture here in SK.

**4x**

increase in the use of AITC-SK's BSE Biotech Kit by teachers since the event.

**100%**

of teachers rated the workshop as awesome.

# Volunteers

## Our Volunteers Make a Difference

In 2019, students spent an incredible 372,000 hours learning about agriculture through AITC-SK initiatives. Our programming extends to all corners of the province and last year we reached 247 communities! As an organization with a small staff, it is impossible to attend all of the events ourselves. AITC-SK depends on the tremendous volunteer efforts of our partner and community members to reach the number of students we do. Our volunteers are knowledgeable and passionate about their role in feeding the world. Students build a personal connection to agriculture through our volunteers, creating a truly memorable learning experience. Volunteering with AITC-SK could involve visiting a classroom, leading a station at an event, hosting a farm and agriculture tour and more! Regardless of how you volunteer, it is a rewarding experience that is making a difference in our province.

# Agriculture in the Classroom Canada

*Agriculture in every classroom,  
inspiring every student*

Agriculture in the Classroom Canada (AITC-C), along with its ten provincial member organizations, believes in the importance of bringing innovative and educational opportunities to students from coast to coast that enhance their understanding and connection to agriculture and food.

AITC-C proudly represents the provincial AITC's, adding a national voice to agriculture education and strengthening members like AITC-SK's capacity to reach more students every year. Last year, Agriculture in the Classroom reached over one million students in Canada and our goal is to surpass that reach in 2020.

Collectively, we are guided by passion, transparency, empowerment, innovation, inclusion and collaboration to ensure that every Canadian student is inspired to consider the role they can play in our country's agriculture and food story.

For more information, visit [www.aitc-canada.ca](http://www.aitc-canada.ca).

*"Every day we're motivated by the amazing work happening in the nine provincial AITC organizations, including AITC-SK. This incredible group, alongside its funders, stakeholders and volunteers, is making a remarkable impact in schools across Saskatchewan! AITC-C looks forward to continuing our collaborations with each province to ensure that agriculture education is highlighted in classrooms across Canada."*

- Johanne Ross, Executive Director, AITC-C

# Our Board

## Message from the Chair

Food connects us all to agriculture. Saskatchewan has an incredible food story and Agriculture in the Classroom Saskatchewan (AITC-SK) is sharing that story through their many educational initiatives. Looking back at another successful year, I am proud of the work that the AITC-SK team has done in connecting over 71,000 students with agriculture.

This report highlights the programs, resources, people and organizations who have helped create the meaningful impact we are having in and out of the classrooms. Not only are we teaching students about where their food comes from, but we are inspiring them to eat healthier, to care about the people producing food, to consider a career in feeding the world, and so much more. Last year we noticed an emerging trend, where teachers are getting their students involved in multiple agriculture learning experiences throughout the year. For AITC-SK this represents a greater opportunity to truly deepen the student's understanding and personal connection to agriculture.

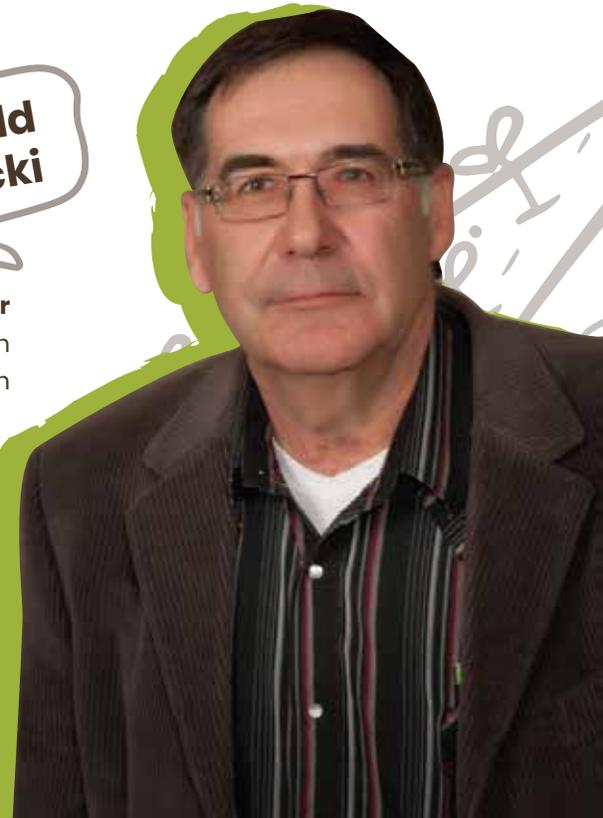

The work AITC-SK is doing is important for the future of the agriculture industry, and we are so thankful to everyone who supports us. Our sponsors provide the financial means for AITC-SK to continue being the go-to source of agriculture education in our province. Our volunteer community helps reach students in all areas of the province and radiates passion when sharing their personal ag stories. I am also grateful for support and strategic direction offered by the Board.

Thank you to the AITC-SK staff for another year of hard work and dedication to connecting kids and agriculture, I look forward to what 2020 brings!
